

Abstract of the Disclosure

Dryer duct and register brush with an elongate handle, a shaft consisting of a pair of semi rigid twisted metal wires and a plurality of bristles intertwined within the twisted wire shaft in a perpendicular orientation. A protective soft plastic cap is fixedly attached to and covering the tip of the wire shaft. The bristles are radially arranged about the shaft so that the bristles form a brush member approximately four inches in diameter and four inches long. The bristles are made of semi rigid nylon or the like. The bristles are equally spaced so that there are approximately one hundred and twenty bristles per linear inch. The shaft is approximately forty three inches long and has a diameter of approximately two hundred and twenty five thousandths of an inch.
